

## GoFaster Installation Procedure

Execute the following instructions step by step:

### On AS/400:

- Sign in on your AS/400 as QSECOFR
- Execute **DLTF QGPL/FASTERI**
- Execute **CRTSAVF QGPL/FASTERI**
- If you've got V5R1 (OS400) version or more, set **WRKSYSVAL QVFYOBJRST** to **1**  
To check your OS400 versión execute DSPPTF  
Keep in mind this previous value so you can restore it later.

### On your PC:

- Save the downloaded PC file, once unpacked or unzipped, in the Directory C:\TEMP
- Open a DOS window. Start, Execute, CMD, Intro.
- Execute the following commands:
- **FTP xxx.xxx.xxx.xxx** (IP Address)
- Insert **QSECOFR** as user ID
- Insert your password for user **QSECOFR**
- **BINARY**
- **PUT C:\TEMP\FASTERI.SVF QGPL/FASTERI**
- **QUIT**
- Close DOS window.

### On AS/400:

- If you had already FASTERI library you should rename it  
**RNMOBJ OBJ(FASTERI) OBJTYPE(\*LIB) NEWOBJ(FASTERI999)**  
or delete it **DLTLIB FASTERI**
- Execute this command  
**RSTLIB SAVLIB(FASTERI) DEV(\*SAVF) SAVF(QGPL/FASTERI)**  
**MBROPT(\*ALL) ALWOBJDIF(\*ALL)**
- Restore, if you did change it, the system value **QVFYOBJRST** with its original value.  
This value is usually **3**

### Codes Insertion and Starting GoFaster:

- Execute **ADDLIB FASTERI** command
- Execute **FASTER** command to enter **Faster** Menu
- Go to option **70.- Codes** Menu
- Insert the access codes and verify them
- Go back to **Faster** Menu to start GoFaster with option **10.-**
- You can also start it with **FASTERI/STRSGF** command.

### NOTE.-

In case you need help or to obtain more information you can address your Distributor or American Top Tools. Had you any problem it is very important to send the following printed screens: Options 40.- and 41.- on **Faster** Menu and Option 4.- on **DSPSYSINF** Menu. It would also help the joblog regarding the actions previous to the problem to solve.
