

Notes on i4Client

=====

After i4Client is installed, there should be a "Detective"-symbol in your System Tray (bottom right of your windows screen).

To access the Setup, right-click on the icon.

To use the extended features of Query Optimizer, it is necessary that you identify the key that represents AS/400 ENTER. This is normally the bottom-right key on the non-numeric table.

For i4Client, the CTRL-Key as a stand-alone keystroke does not function. Please define the CTRL-ENTER key for this option.

For use with iExcelGen and i4Spool, it is necessary to fill the Machine Name, User and Password. This data is used to transfer files via FTP.

Please leave all fields in the "Transfer Settings" section blank. Instead, choose FTP-Method.
